Student Demographics

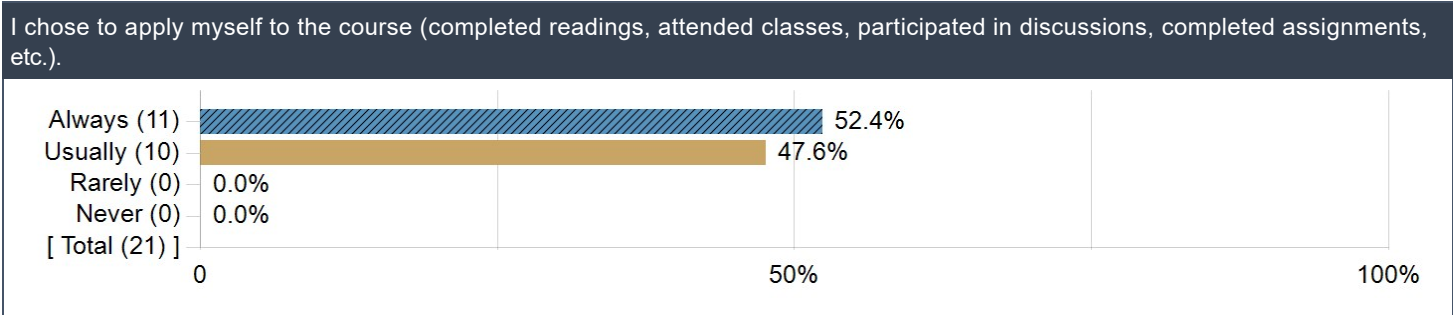

Why did you enroll in this course?

Please explain:

Comments
didnt expect to like it but i did
I was required to take the class for my major that was business.
This was a required course for me to start taking an OSC course

I chose to apply myself to the course (completed readings, attended classes, participated in discussions, completed assignments, etc.).

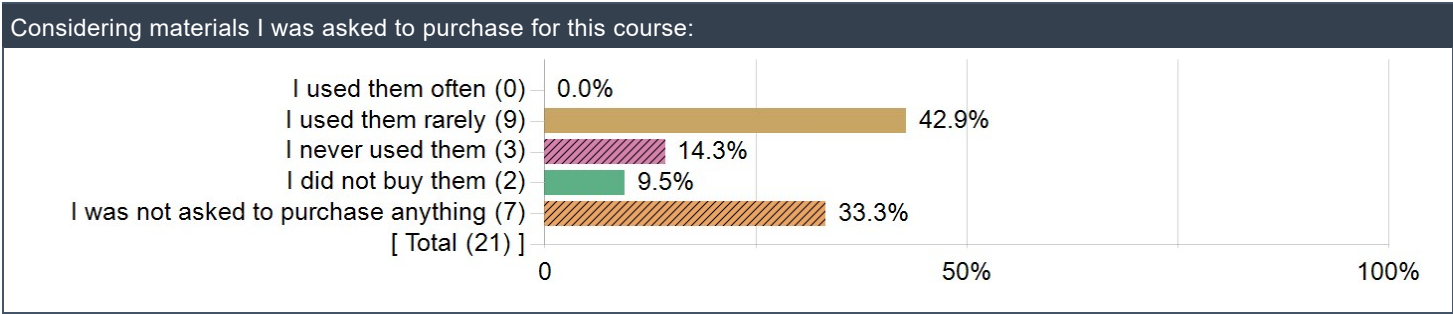

Please explain:

Comments
Started off the semester not applying myself as much as I could have, but worked on it from there.
I always grinded so my grade turned out good. Plus good teacher and LAs
Did almost every homework assignment and missed only 2 days of class throughout the whole semester.
I tried my best to apply myself in this course but math is not my favorite subject and sometimes becomes very frustrating.

Course Materials

Considering materials I was asked to purchase for this course:

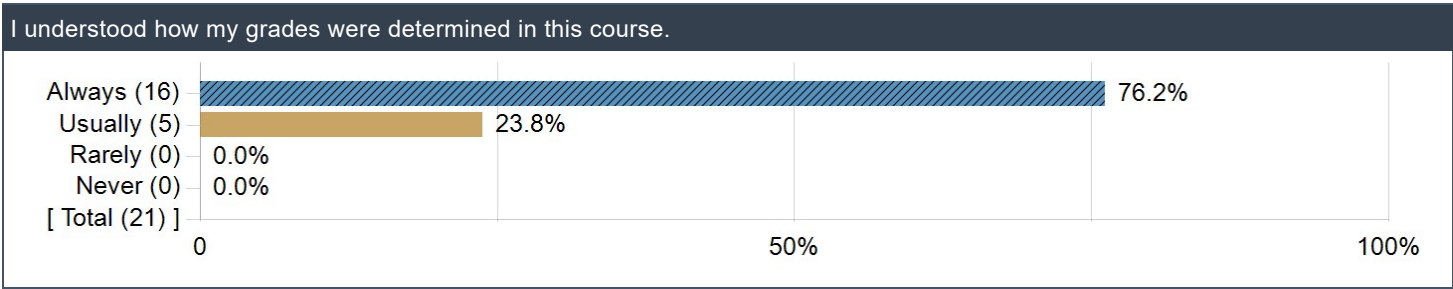

Please explain:

Comments
I utilized the homework frequently for reviews, but I did not use a textbook – if we even had to buy one
I didn't see a reason to use the book because of the other resources available.
I don't think we were required to buy anything for this class.

Grades

I understood how my grades were determined in this course.

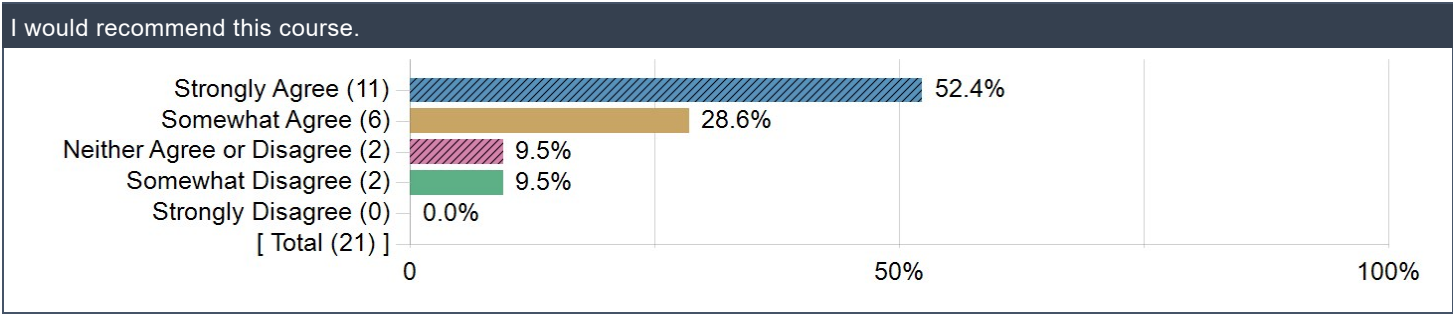

Please explain:

Comments
The grade breakdown in this course was fair and made sense

Recommend Course & Instructor

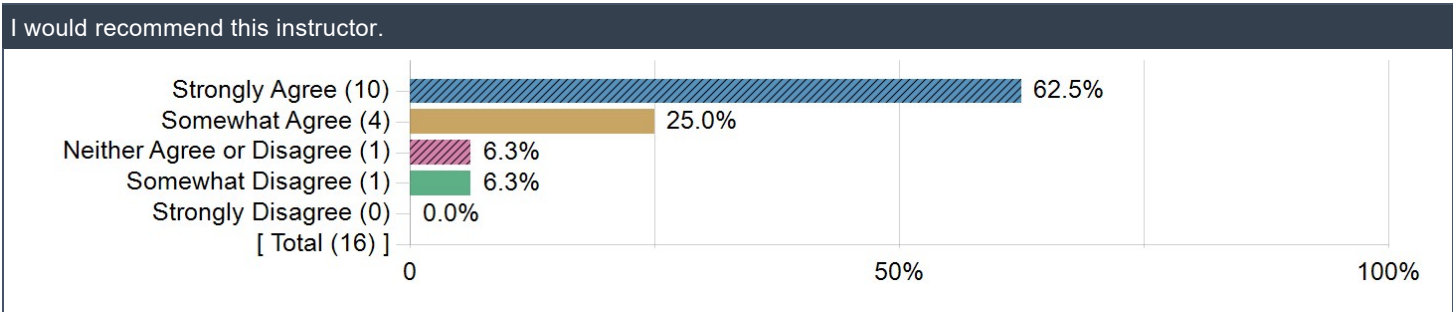

I would recommend this course.

Please explain:

Comments
Despite my struggles in math, this course was very well put together and enjoyable
Im not a fan of math.

I would recommend this instructor.

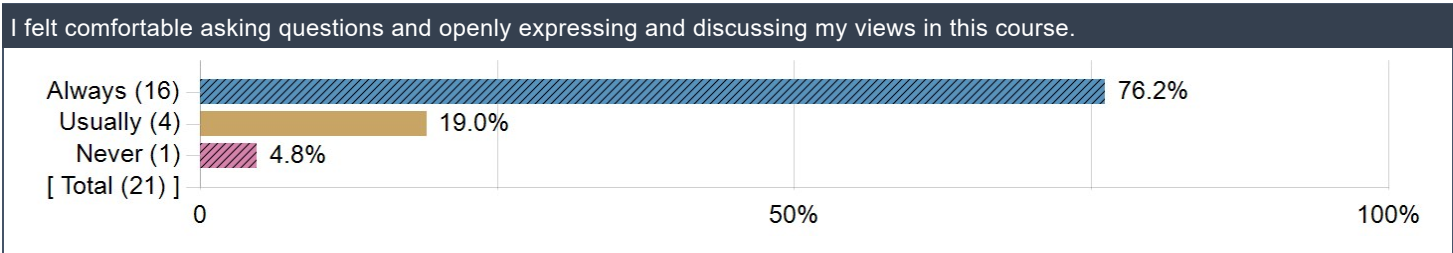

Please explain:

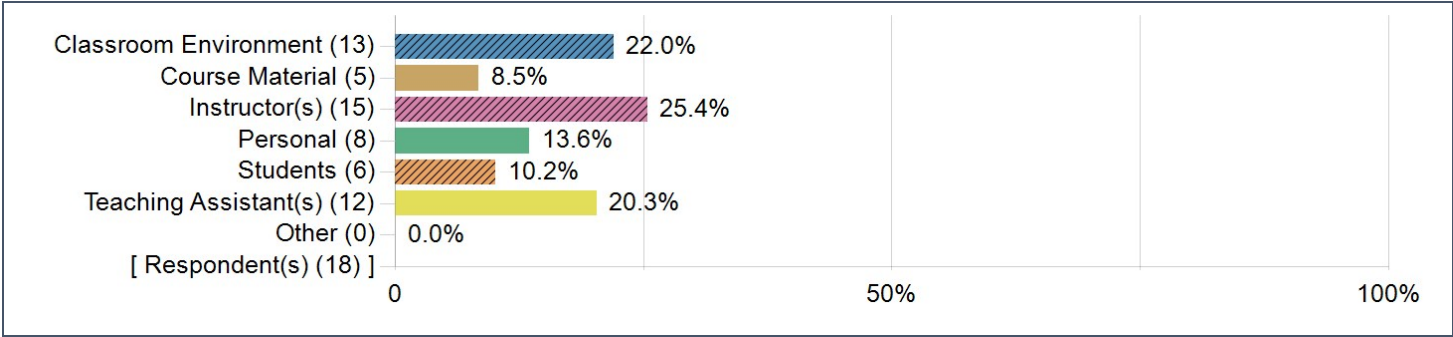

Comments
Great teacher
The most understanding and kind teacher I have had
GOAT
He was very willing to help all the time and was willing to give us opportunities to succeed rather than fail.
I loved his teaching style and how his notes were pre done and online
He's a great instructor overall. I thought the class wasn't very responsive though.
Professor Chen was a very good professor and gave us what we needed to do well in the course.
he was helpful but couldn't understand clearly what he was saying nor his handwriting
Professor Chen does great at explain things, he takes steps calmly and making sure that students understand them.

Asking Questions and Discussing Views

I felt comfortable asking questions and openly expressing and discussing my views in this course.

Which of these contributed to your answer?

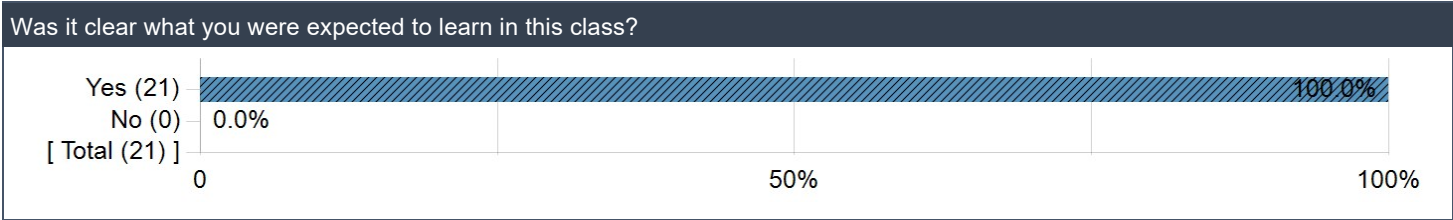

Please explain:

Comments
Class as a whole was very nice – professor was the highlight
Goated TA

Learning Objectives

Was it clear what you were expected to learn in this class?

Please explain:

Comments
Expectations were clearly laid out on Day 1
math.

Additional Comments

What does this instructor do to help you learn?

Comments
Everything
He kept the lessons clear and concise and made sure we really understood what we were learning.
He is very welcoming and has a really nice energy to himself that makes us students feel comfortable talking to him
The paper material really help me gather concepts. It is also easier for me to review.
Organizing the structure of the class well, having lots of office hours and encouraging dialogue/questions in class
Go through things very slowly and also asks for feedback often on the best way to learn
He helps us understand each thing
He's very knowledgeable and he's way overqualified. Super smart and he can explain topics really well and efficiently
Mathematics
He gave us videos and great ways to practice for exams and quizzes.
He was very patient in my learning ability
He went over notes every day.
Helps me apply math skills to real world situations
He explains things very carefully and making sure that students understand them.
has clear notes, However i wish he had a more confident voice and way of explaining things.

What could this instructor do to improve or increase learning opportunities in this class?

Comments
Nothing
i think following packets and going through them slower will make the course more effective
Nothing because Haoyu is the GOAT
N/A
I think slow down and go through more examples
Do another review day before tests would be huge.
he could incentivise the office hours.
I think having more group work could be helpful.
Slowing down sometimes in material could be beneficial
clearer handwriting.
Zoom in on his class notes. Be more engaging by showing us real world examples
Not very much as he already does things great that helps the students to understand.
Be more outgoing and confident

Is there anything else you would like this instructor to know?

Comments
thank you! i feel like this made my relationship with math better
Thank you for all your effort making us easier to learn with paper sheets.
He's the goat
He is awesome.
That I wish him safe travels on his summer vacation back to his home town in China :D
Good luck with your Phd you deserve it.
no. he's a great teacher.
N/A
Thank you for all you help and support genuinely
he had a lot of office hours and TA/LA labs, very helpful
Thank you for your efforts this year!
N/A
No, he was a very nice man.
